Tattoo Aftercare:

- 1) After one hour remove your bandage. **DO NOT** leave on for more than 3 hours or overnight.
- 2) Wash your tattoo with a mild, fragrance free liquid soap. Preferably antibacterial such as Dial or Soft Soap and lukewarm water. Taking a shower would be the best bet to ensure all of the blood is off of your tattoo.
- 3) With a clean, soft towel dab your tattoo dry.
- 4) With clean, dry hands apply a very **THIN** layer of ointment. We recommend **ONE** the following 3 times per day:
 - a) Aquatat (sold at the shop or online)
 - b) Aquaphor (sold at any drugstore, made by Eucerin)
- 5) After about 4 days you may see flakes of the color come up on your tattoo, that is normal, it will shed much like a sunburn, once this happens stop using any healing ointments and switch to an unscented lotion.

Proper after care of your tattoo is incredibly important for longevity. If you follow these instructions you should have no problems with your tattoo. **DO NOT** listen to friends and family when it comes to proper aftercare. If you have any questions, comments or concerns please contact us via phone or email. We will gladly assist you. All of our work is guaranteed.
